Assignment 2 Summer 2023

Instructions:

This is an individual assignment!

It requires you to develop a simple Address book page with Next.Js.

The page should consist of a component for selecting between the type of User --> Student /Teacher. For this part, you can use the Dropdown Menu or Radio Button elements.

Once the user is selected a list / table with names, addresses, and images should be rendered.

Upon clicking over the image, detailed information should pop out in a modal.(optional for extra points)

You should have an add button which is going to add a new Student/Teacher to the list , hardcoded in your component.

Last feature you will need is a Search component.
